

Still here

June 29 12

Dear Ma & Kid

Well how are you all I am
feelin fine this morning I havent sat up any
yet but I get up on my elbow once in a while and
my head goes around like a wheel yet
I dont think you will need to send the things
I wanted cause I dont think I will be here very
long I think some of these days they will get
me up and teach me to walk and then send
me home the nurse said I would have to learn
to walk again I lost my dandy little nurse
Miss Ostrandar they put her on a special case
But she comes to see me two or three times a day
days her patient sleeps all the time and she dont
have any thing to do there was a woman elid
just across the corridor from here last
night dont know what was the matter
it has been pretty darned hot these nights
dont you think there was a nurse dressed my
wound last night that had the same thing

that I have only she said her appendix was
gangrenous I have got acquainted with
several fellows that have been able to walk
around but the last one is leaving this morning
Clark & Virgil were in to see me a few days ago
for a few minutes that kid is nearly as tall
as Clark your oranges are holding out
first rate I have two of them yet

There was a bunch of automobilez making
a run from St. Louis to Chicago just went by
there is 8 of them I bet that would be a
dandy trip Well it is nearly ten o'clock
and there hasn't been any ~~work~~ work in to do
any thing for me yet this morning
I guess they must be busy

Well I am going to quit if any body asks you tell
them I am getting darned anxious to go
home Roy
